

SALAH-EDDINE LACHKAR

Full-Stack Developer | React, Next.js & Node.js

Frontend engineering • AI-assisted delivery • Technical leadership

Casablanca, Morocco | UAE resident | Open to remote work

lachkar.salah@outlook.com

lachkar.me | github.com/artpumpkin | [LinkedIn](#)

PROFILE

Full-stack developer building SaaS products and responsive, pixel-perfect dashboard interfaces with React, Next.js and Node.js. Combines hands-on development with team coordination, collaborative problem-solving and ownership from requirements through delivery. Disciplined and quick to learn, with a drive to improve and an active interest in emerging technologies, including AI-assisted development.

TECHNICAL SKILLS

Web HTML, CSS, JavaScript, TypeScript, React, Next.js

UI and design Figma, Chakra UI, shadcn/ui, Tailwind CSS, Framer Motion

State and forms Zustand, TanStack Query, React Hook Form, Zod

Backend and data Node.js, Express, NestJS, REST APIs, MongoDB, PostgreSQL, Prisma

Quality and version control Vitest, Jest, Postman, Google Lighthouse, Git/GitHub

Deployment and operations Docker, GitHub Actions (CI/CD), Caddy, PM2, Cloudflare

Team collaboration Agile practices, Jira, Trello, Monday.com, Slack

PROFESSIONAL EXPERIENCE

MRPNL

May 2026 - Present

Full-Stack Software Engineer & Project Manager

Side SaaS project | Remote | mrpnl.com

- Build a trading education and market-monitoring platform with Next.js, NestJS and PostgreSQL; coordinate delivery with the team.
- Develop administration, content and invoice workflows, including currency display and shared credits, with component and API tests.
- Create live market dashboards and technical-indicator context, alongside reusable content and image-generation automations.

TickTickTrader

Mar 2023 - Apr 2026

Technical Lead | Previously Technical Advisor

Isle of Man-based company | Remote, then Abu Dhabi from Oct 2024

- After four months as advisor, led approximately 7 people maintaining customer dashboards, aMember systems, Forest Admin tooling and analytics.
- Developed React/TypeScript administration interfaces and backend integrations for trading operations while coordinating ongoing team delivery.
- Built market-monitoring UIs, trading algorithms and backtesting tools using Java/Bookmap, C#/NinjaTrader and Pine Script/TradingView.

AI ASSISTED DEVELOPMENT

- Direct coding agents from requirements and repository context through components, pages and full apps (vibe coding), using iterative prompts, tests and UI review. Current tool: Codex; previously Claude and GitHub Copilot.
- Build reusable agent skills and plugins for MRPNL and daily tasks: article validation, images, social content, Trello cards and video-to-slides workflows. Review generated work for architecture, security and performance.

PROFESSIONAL EXPERIENCE CONTINUED

Chain Pixel Labs

Oct 2021 - Mar 2023

Frontend Developer → Full-Stack Developer → Technical Lead

Company profile

- Built React/TypeScript dashboards and decentralized applications for Samurai Rising and Samurai Legends, integrating APIs, wallets and Solidity smart contracts.
- Expanded into MERN full-stack development, backend services and automation; progressed to leading approximately 3 people while continuing engineering work.

Pink Panda Holdings

2021 - 2022

Independent Software Contractor | PinkPanda / BambooDAO

- Contract work covering wallet beta Web3 components, Solidity staking contracts, a React interface, Hardhat tests and BAM migration tooling.

Freelance Development

2021

JavaScript & Web Automation Developer

- Created an EVM token-trading bot with Node.js and Ethers.js, and automated browser workflows using Selenium and Puppeteer.

SELECTED PROJECTS

Mosaic | Desktop finance and health tracker | 2026 | [Source](#)

- Built with Tauri, Next.js, TypeScript and SQLite: finance and health tracking, local records, and encrypted backup and transfer.

Idescape | Digital agency website | 2026 | [idescape.com](#)

- Built alongside MRPNL in 2026 with Next.js, Tailwind CSS and Framer Motion; implemented React Hook Form/Zod validation, accessible mobile layouts, SEO and Docker/GitHub Actions delivery.

SAFAR | Arabic NLP Research Platform | 2020 - 2021 | [Project](#)

- SAFAR master's project with EMI: built a React/Chakra UI frontend and collaborated on research comparing Python Arabic NLP tools.
- Implemented English/Arabic and right-to-left layouts, data exports, speech input and progressive web app support, supervised by two EMI professors.

EDUCATION

Master in Data Science and Big Data | 2019 - 2021

Hassan II University of Casablanca

Bachelor's Degree in Mathematics and Computer Science | 2018 - 2019

Hassan II University of Casablanca

LANGUAGES

English and Arabic
